Dear Respondents,

The aim of this questionnaire is to assess the level of satisfaction of doctoral graduate students with regard to their studies at the School of Linguistics, University of Debrecen. It is in the best interest of all of us to ensure that the doctoral programmes fulfill their task of training young scholars who will be able to meet the challenges of pursuing a successful academic career. To achieve this aim, it is necessary to have regular feedback from our students. This is where your help is needed now. In the evaluation form below, part of a series of measures designed to improve the quality of our programme, you are kindly asked to give feedback about your experiences as a doctoral student in the past academic year. Rest assured that your response will be taken very seriously, helping us improve the academic and institutional environment of your doctoral studies. Please note that your answers cannot be 'wrong' as long as they express your own opinions and impressions, and that filling in the questionnaire is voluntary and anonymous. Thank you for taking the time to assist us in improving our doctoral programme.
